

Sealed Air to Feature Newly Expanded Portfolio of Automated Systems and Packaging Solutions at Pack Expo

September 23, 2019

CHARLOTTE, N.C.--(BUSINESS WIRE)--Sep. 23, 2019-- This week Sealed Air (NYSE: SEE) will feature its latest automated solutions and packaging options at Pack Expo 2019. Many of these innovations are designed to help companies of all sizes eliminate waste and drive more sustainable operations.

This is Sealed Air's first global packaging event since its acquisition of Automated Packaging Systems, Inc. (APS), a leading manufacturer of automated bagging systems. Completed in August, this investment allows Sealed Air to better serve the e-commerce, fulfillment and food packaging markets. APS brings highly complementary and additive capabilities to Sealed Air, including expertise in engineering, automation technology and sustainability.

Pack Expo is the world's largest packaging trade show. It will be held September 23-25 in Las Vegas. Sealed Air will exhibit selections from its portfolio at booth C-2041 and APS will exhibit at booth C-1814. For additional details, visit Sealed Air's Pack Expo [webpage](#).

Solutions Featured at Pack Expo Include:

Automated Packaging Solutions to Showcase:

Autobag® 650™ Horizontal Bagging System

Autobag 650 from APS is a wide bagging system designed for horizontally packaging large products for e-commerce fulfillment. It's engineered with an emphasis on ergonomic design for the operator and features an inline thermal transfer printer, which eliminates the need for a separate labeling operation.

Polyester Laminated to High Barrier, Coextruded Packaging Film

Polyester Laminated to High Barrier, Coextruded Packaging Film from APS offers oxygen barrier properties for food products that require extended shelf life and odor containment. The film is available in non-structured and stand-up pouch configurations.

Sealed Air to Showcase:

SEALED AIR® brand StealthWrap™ F7AC Parceling Film

Sealed Air® brand StealthWrap parcelling film seals and protects packages during transit, eliminating the need for overboxing. The new F7AC model wraps larger, heavier items at 30 packs per minute while adding tracking labels. The system features three-sided scanners that result in minimizing labor and uptime.

BUBBLE WRAP® brand Instasheet Select™ System

Bubble Wrap® brand Instasheet Select is a new automated system that streamlines packaging operations by eliminating the need to manually insert protective material. Placed on the conveyor line, the system automatically cuts and inserts Bubble Wrap® brand inflatable cushioning to the size of each box, which eliminates packaging waste and increases throughput.

BUBBLE WRAP® brand Jiffylite® Auto Compact Mailer System

Bubble Wrap® brand Jiffylite Auto is an automated pack-station system developed for operations using kraft bubble mailers. The tabletop machine enables faster loading and heat sealing, which can improve throughput velocity. The heat seal enables bubble protection at the closure and creates a tamper-evident package.

CRYOVAC® brand Onpack-3002 Automated Pumpables System

Cryovac® brand Onpack-3002 is a vertical pouch packaging solution for pumpable food products such as soup, sauces and condiments. It has been upgraded to function as a dueling system that allows processors to fill two pouches at the same time, doubling productivity with up to 140 bags per minute.

About Sealed Air

Sealed Air is in business to protect, to solve critical packaging challenges, and to leave our world better than we found it. Our portfolio of leading packaging solutions includes Cryovac® brand food packaging, Sealed Air® brand protective packaging, and Bubble Wrap® brand packaging, which collectively enable a safer, more efficient food supply chain and protect valuable goods shipped around the world. Sealed Air generated \$4.7 billion in sales in 2018 and has approximately 15,500 employees who serve customers in 123 countries.

Website Information

We routinely post important information for investors on our website, sealedair.com, in the Investors section. We use this website as a means of

disclosing material, non-public information and for complying with our disclosure obligations under Regulation FD. Accordingly, investors should monitor the Investors section of our website, in addition to following our press releases, SEC filings, public conference calls, presentations and webcasts. The information contained on, or that may be accessed through, our website is not incorporated by reference into, and is not a part of, this document.

Forward-Looking Statements

This press release contains “forward-looking statements” within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 concerning our business, consolidated financial condition and results of operations. Forward-looking statements are subject to risks and uncertainties, many of which are outside our control, which could cause actual results to differ materially from these statements. Therefore, you should not rely on any of these forward-looking statements. Forward-looking statements can be identified by such words as “anticipate,” “believe,” “plan,” “assume,” “could,” “should,” “estimate,” “expect,” “intend,” “potential,” “seek,” “predict,” “may,” “will” and similar references to future periods. All statements other than statements of historical facts included in this press release regarding our strategies, prospects, financial condition, operations, costs, plans and objectives are forward-looking statements. Examples of forward-looking statements include, among others, statements we make regarding expected future operating results, expectations regarding the results of restructuring and other programs, anticipated levels of capital expenditures and expectations of the effect on our financial condition of claims, litigation, environmental costs, contingent liabilities and governmental and regulatory investigations and proceedings. The following are important factors that we believe could cause actual results to differ materially from those in our forward-looking statements: global economic and political conditions, currency translation and devaluation effects, changes in raw material pricing and availability, competitive conditions, the success of new product offerings, consumer preferences, the effects of animal and food-related health issues, pandemics, changes in energy costs, environmental matters, the success of our restructuring activities, the success of our financial growth, profitability, cash generation and manufacturing strategies and our cost reduction and productivity efforts, changes in our credit ratings, the tax benefit associated with the Settlement agreement (as defined in our most recent Annual Report on Form 10-K), regulatory actions and legal matters, and the other information referenced in the “Risk Factors” section appearing in our most recent Annual Report on Form 10-K, as filed with the Securities and Exchange Commission, and as revised and updated by our Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. Any forward-looking statement made by us is based only on information currently available to us and speaks only as of the date on which it is made. We undertake no obligation to publicly update any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future developments or otherwise.
