Notes:

⁽¹⁾ EBIT is defined as earnings before interest expense and income tax (benefit) provision. EBITDA is defined as EBIT plus depreciation and amortization. EBIT and EBITDA do not purport to represent net earnings or net cash provided by operating activities, as those terms are defined under U.S. generally accepted accounting principles, or U.S. GAAP, and should not be considered as an alternative to such measurements or as indicators of the Company's performance. The Company's definitions of EBIT and EBITDA may not be comparable with similarly-titled measures used by other companies. EBIT, EBITDA and Adjusted EBITDA are among the indicators used by the Company's management to measure the performance of the Company's operations and thus the Company's management believes such information may be useful to investors. Such measures are also among the criteria upon which performance-based compensation may be based.

⁽²⁾ Adjusted EBITDA is defined as EBITDA adjusted for: (1) gain on sale of equity method investment, (2) impairment of non-current investments-available-for-sale securities, (3) global manufacturing strategy charges, (4) restructuring and other charges, (5) advisory expenses incurred prior to ceasing work on an acquisition, (6) loss on sale of a small product line in 2007 and (7) asbestos settlement and related costs.
